OUR GLOBAL FOOTPRINT

Exporting to over **45** countries, Globus International has established itself as an imminent producer of release liners across the globe.

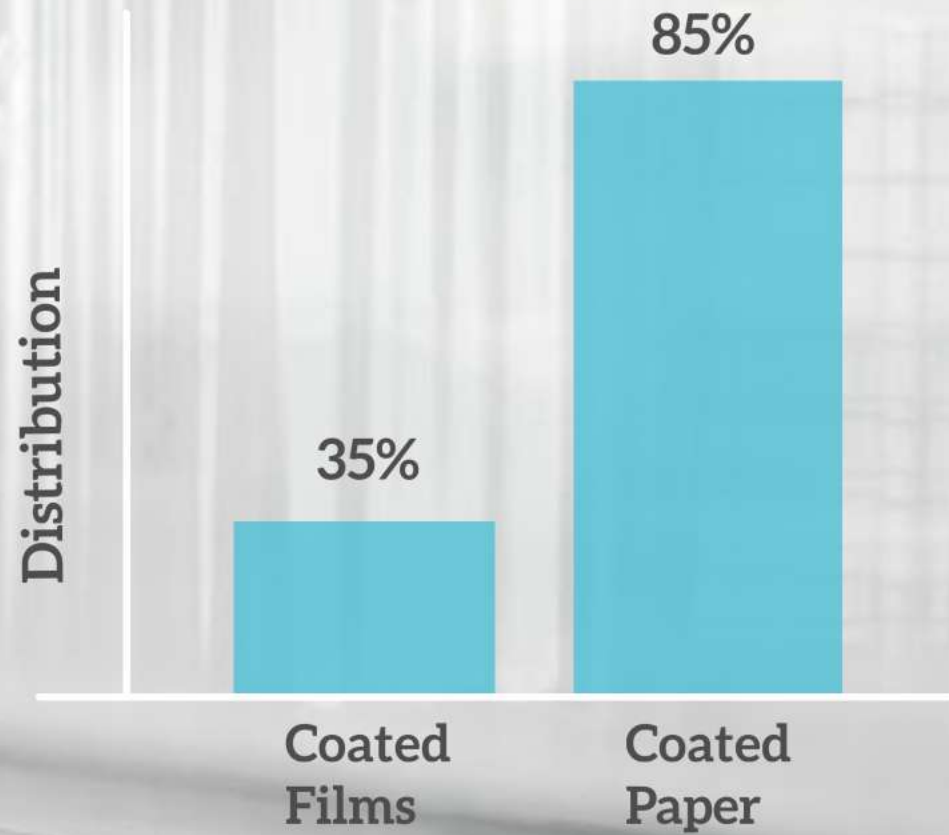

What is a release liner?

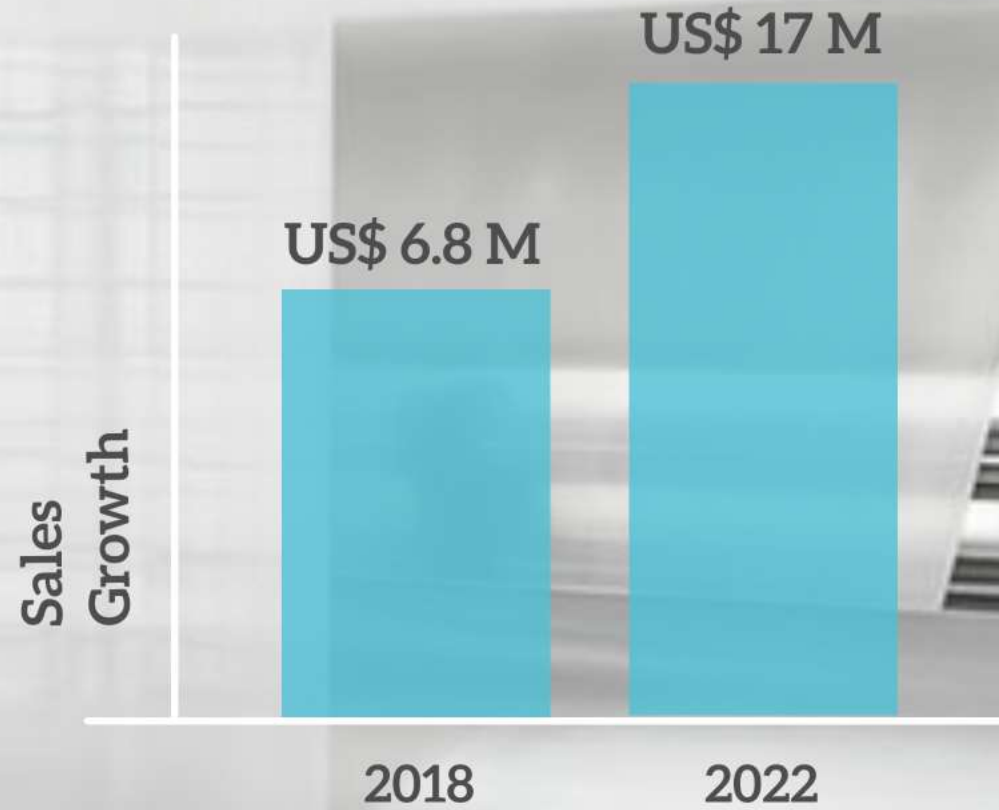

"A release liner is a paper or film substrate which backs an adhesive coated surface until the end use with a desirable release force"

PRODUCTS

GROWTH

- Globus International Coaters Pvt. Ltd, is located in Maharashtra, India. The site covers a 3000 square meter area where we manufacture a wide range of Silicone coated Release Liners which find application in Self-adhesive tapes, sealed envelopes, Baggage tags, Self-adhesive Labels, Bandages, Feminine napkins, Automotive tapes, Insulation, Graphic arts, Composites and many more.
- Starting our journey in the year 1992 with the focus being 'Siliconizing', we have evolved to gain great experience and knowledge dealing with a range of applications of the release liner.
- Exporting to more than 45 countries, we believe in collaborating with our clients and delivering the most effective and consistent solutions to their product needs.

OUR TEAM

Globus International's success in creating solutions for self-adhesive needs is due in large part to our talented team comprising of 120 diligent employees with 10% of them having over a decade of experience in the field of Silicone coating.

Our Journey

Globus receives FSC Certification and along with ISO 14000 and ISO 45000 certification norms

2023

Globus surges past the 100 crore revenue mark and establishes itself as a Global release liner producer with 80% exports to over 55 countries

2021

Commencement of production at Unit-2 with the addition of our third coater of 1.8m width and three new slitters to further strengthen our production lines

2020

Expansion of our facility to 3000m2 and incorporation of ERP for business transformation

2014

Globus adds the 2nd coating line of 1.75m & 2 new slitters upto 2.5m width

2008

2004

First coating line of 1.35m is commissioned

Globus comes into existence as a prominent paper importer and exporter

1992

Self-Adhesive Labels

- ∅ Liners designed to deliver a smooth release force for high speed dispensing self-adhesive labels
- ∅ Release paper and films having a lay-flat profile and work with solvent based, acrylic and water based or hot-melt adhesives

Self-Adhesive Tapes

- ∅ Customized release coatings for a variety of adhesives like hot-melt, acrylic, Silicone PSA's having different tack levels
- ∅ One side and both sides coated liners with possibility of differential release levels on either side.
- ∅ Special Fluoro Silicone coated release liners suitable for Silicone PSAs

Graphic Arts

- ∅ The Graphic Arts market is ever-growing with new applications and materials needed with changing times and challenging product needs.
- ∅ Our product range includes release liners with optimal performance in different graphic arts applications, such as:
 - ∅ *Advertising*
 - ∅ *Exhibitions*
 - ∅ *Vehicles*
 - ∅ *Traffic and safety signs*
 - ∅ *Overlaminating films*

Hygiene

The films, release liners, and laminations offered by Globus International help ensure proper protection of sensitive products, and ensure correct application of many medical, hygiene and personal care materials. Our research and development team is ready to help you with any highly specialized applications or requirements.

Composites

We supply products with consistent release on one or two sides and we design release formulations for specific impregnation resins. We rely on a wide range of paper substrates so as to cover a wide variety of processes, relative humidity at the point of production and pre-pregging conditions.

Construction, Automotive & Insulation

Building and Construction market has a large variety of adhesives to meet the needs of different climates and temperatures at the different latitudes. Globus International, strong of their experience, will support your choice and suggest the best release liner for your product. Liners can be whether mono or bi-coated, also differentially coated on both sides.

Major application areas:

- Ø Shingles
- Ø Self-adhesive membranes
- Ø Sealing tapes

OUR VISION

To manufacture growth - For our customers, suppliers & people
